In collaboration with

Generative AI-Enhanced  
Knowledge Management in Business

# The toolkit for easy GenAI solutions development and implementation

Dmitry Kudryavtsev, Jukka Remes

Haaga-Helia University of Applied Sciences, Helsinki

Co-funded by  
the European Union

# Motivation

GenAI has huge potential to transform knowledge work

## BUT

- Most companies lack the technical expertise and capabilities to implement GenAI solutions effectively, especially SMEs
- The pilot to production chasm
- Business value from GenAI implementation is still limited

Co-funded by  
the European Union

# Potential solution

## Building blocks

## Guidelines

## Real results

### Benefits:

Quicker implementation, Less risks, Less resources, Higher solution quality

Co-funded by  
the European Union

# Generative AI-enhanced Knowledge Management (GAIK) project – the implementation of this approach

**The primary project goal:**

Creation of the **open toolkit** for knowledge-focused GenAI solution development and implementation

**Target audience:** Small and Medium-sized companies (SMEs)

**University-Industry cooperation**

**Project consortium:**

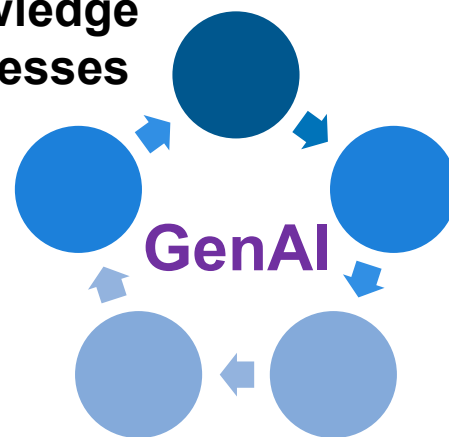

3 universities and 5 companies (Luvata, Lotus Demolition, QAdental, Azets, Dynamik).  
And we are extending cooperation with companies and international partners

**Timeline:** 01.02.2025 – 31.01.2027

**Methodology:** (Action) Design Science Research

**Knowledge processes**

**Co-funded**

by the European Union  
(European Regional Development Fund),  
universities and companies

Co-funded by  
the European Union

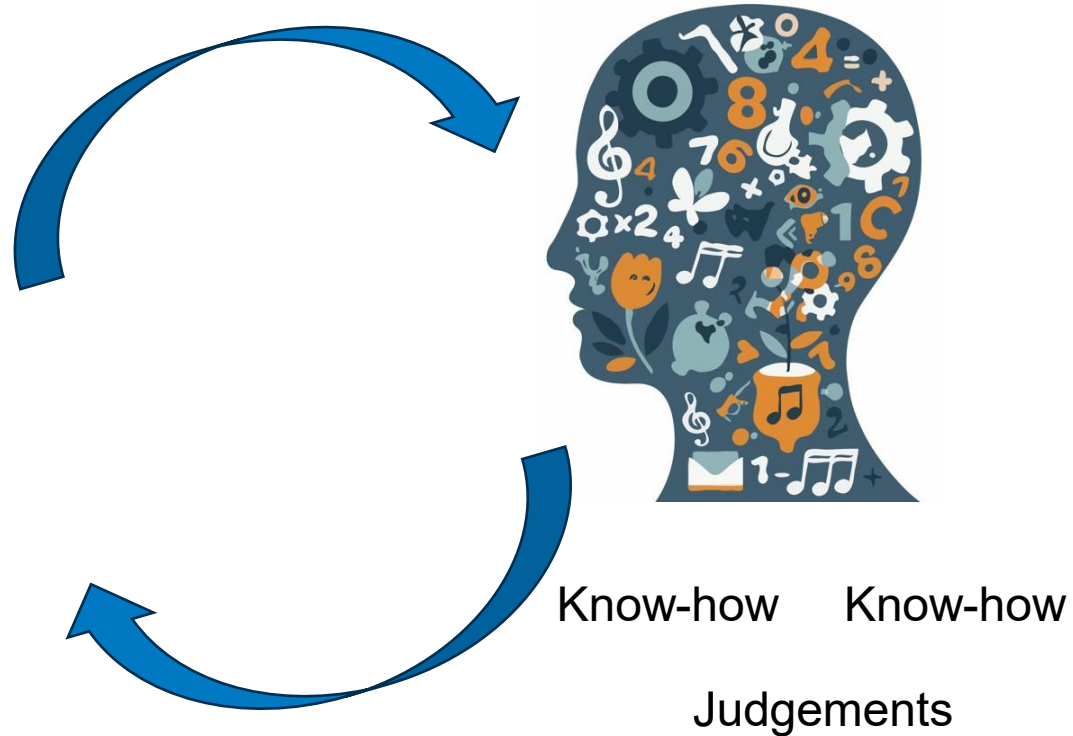

# Knowledge

## Documented knowledge

Texts      Diagrams      Videos  
Voice recordings      Tables

## Tacit knowledge

Know-how      Know-how  
Judgements  
Experience      Insights

# Scope of the GenAI toolkit (1/2)

Knowledge process	Examples	Expected value for business
<b>Knowledge access</b>	Intelligent access to organizational knowledge (document repositories, databases, wikis, CRMs)	Finding relevant information faster with less efforts
<b>Knowledge synthesis</b>	Automatic generation of business reports, sales proposals, marketing materials, project proposals	Reduced time and effort required to produce reports and documents, resulting in cost and time savings, and timely decisions.
<b>Knowledge capture</b>	Extract needed information from business documents, videos, voice recordings, emails, and meeting recordings	Quick and cost-effective information extraction from documents, voice recordings, and videos

# Scope of the GenAI toolkit (2/2)

Knowledge process	Generic use cases	Company-specific use cases
Knowledge access	Intelligent access to organizational knowledge (document repositories, databases, wikis, CRMs)	<ul style="list-style-type: none"><li>• Search and recommendations for audio and video content library</li><li>• Sales and customer onboarding assistant for a complex, customizable software product</li></ul>
Knowledge synthesis	Automatic generation of business reports and documents	<ul style="list-style-type: none"><li>• Sales proposal generation</li><li>• Purchase order processing</li><li>• Incident reporting</li><li>• Customer experience reporting</li></ul>
Knowledge capture	From speech, images and texts to structured documents	<ul style="list-style-type: none"><li>• Creating construction site diaries from speech, images and text</li><li>• Building inspections report preparation</li><li>• Creation of closed captions in various languages for instructional videos and podcasts</li></ul>

# Target audience of the toolkit

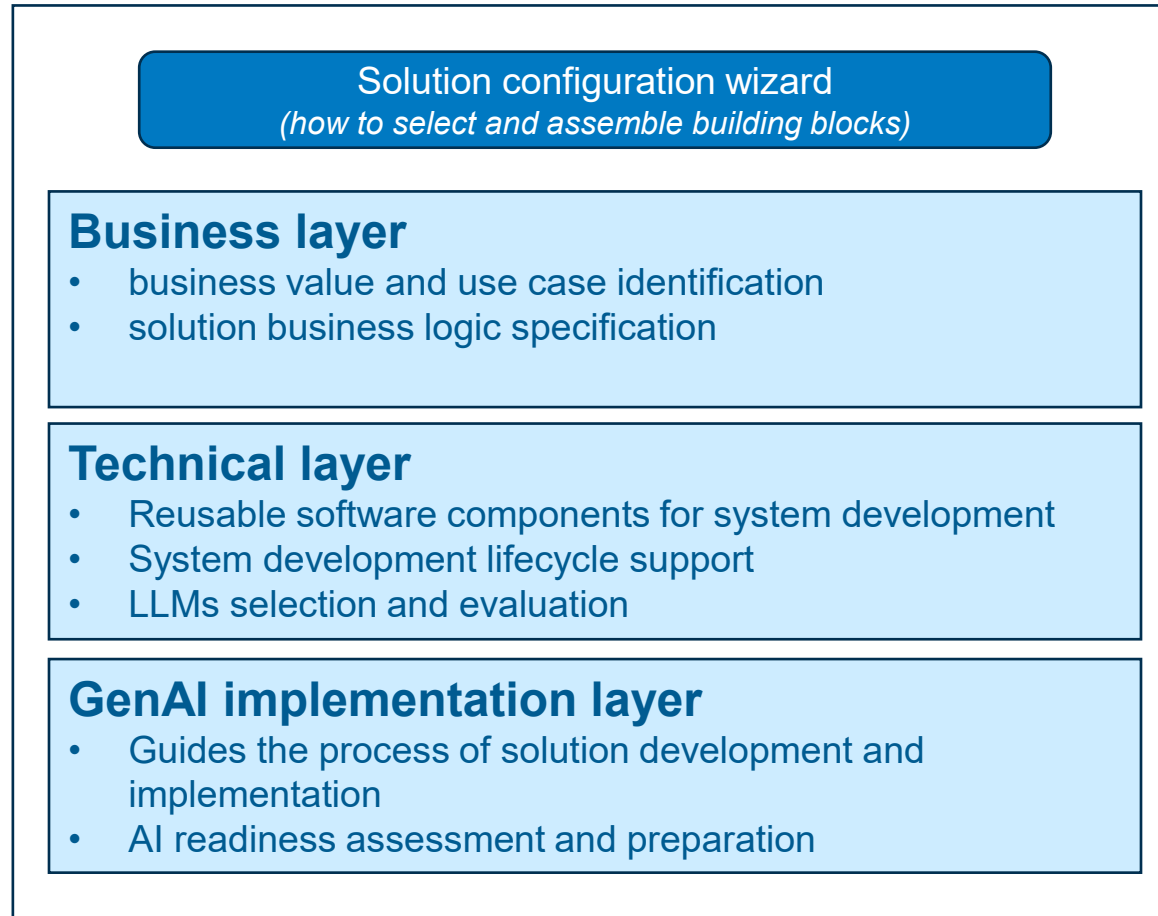

- A. Managers and/or domain experts with digital skills** (no-code development, vibe coding, GenAI application skills)
- B. IT specialists** with software development and coding skills with limited GenAI experience

# Components of the GenAI toolkit

## for knowledge-focused GenAI solution development and implementation

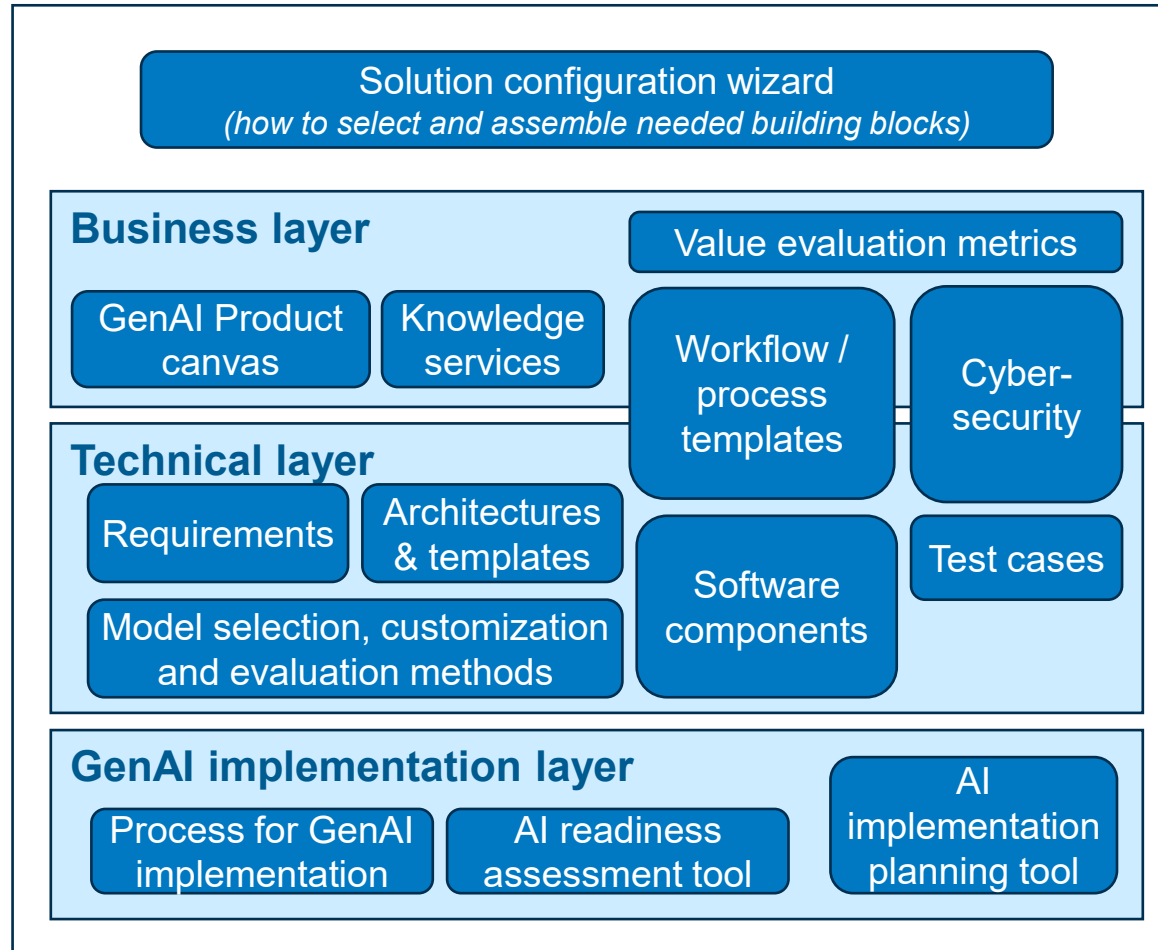

### Overview

# Components of the GenAI toolkit

## for knowledge-focused GenAI solution development and implementation

### Some details

# Examples of knowledge services and their implementation (1/3)

## Knowledge capture

## Capturing knowledge through voice

### Workflow template

1. Optional: ask questions
2. Record audio file
3. Upload audio file
4. Transcribe the file

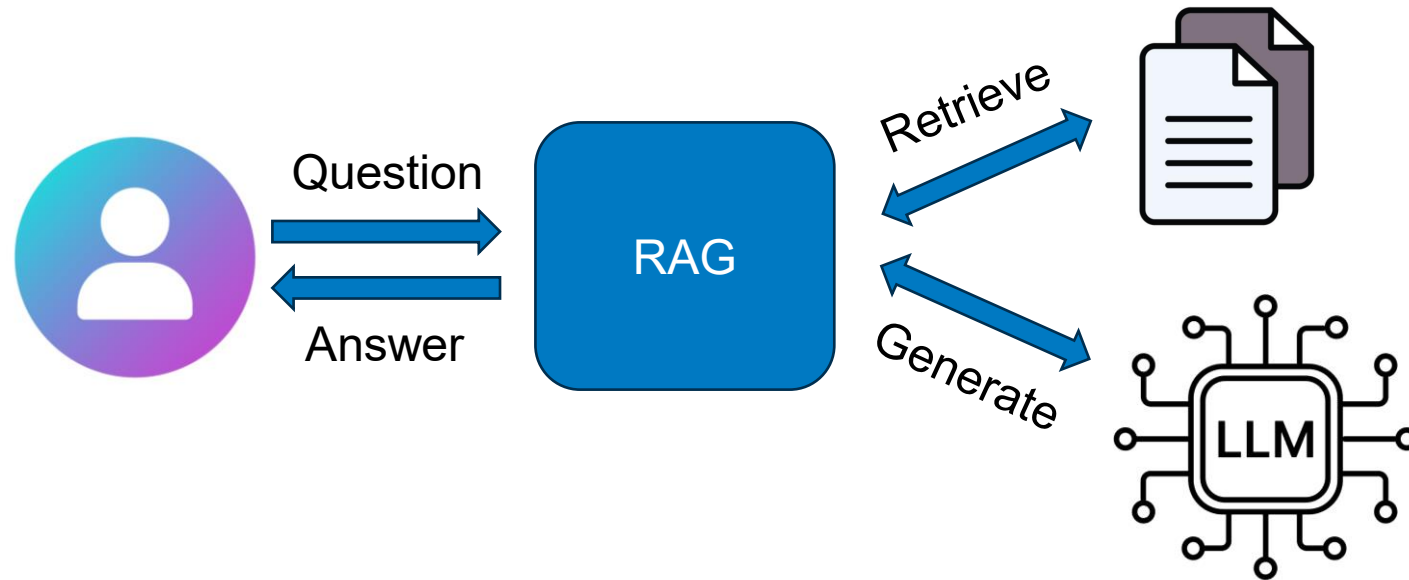

### Software components

- Voice recorder
- Data loader
- LLM node/functions

# Examples of knowledge services and their implementation (2/3)

Knowledge access

Talk to your data using RAG\*

Workflow template

1. Data preparation
2. Indexing
3. Retrieval
4. Augmentation
5. Generation

Software components

- Document Loader
- Embeddings Model
- Vector DB
- LLM

\* RAG – Retrieval Augmented Generation

# Examples of knowledge services and their implementation (3/3)

Knowledge synthesis

Document/report generation

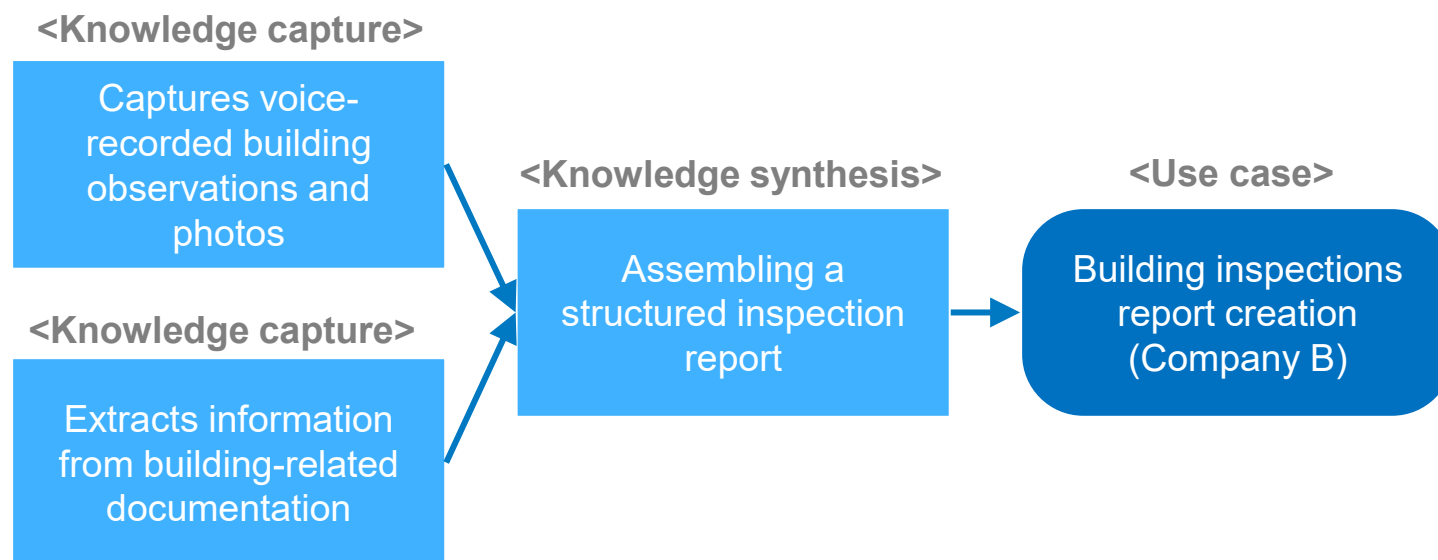

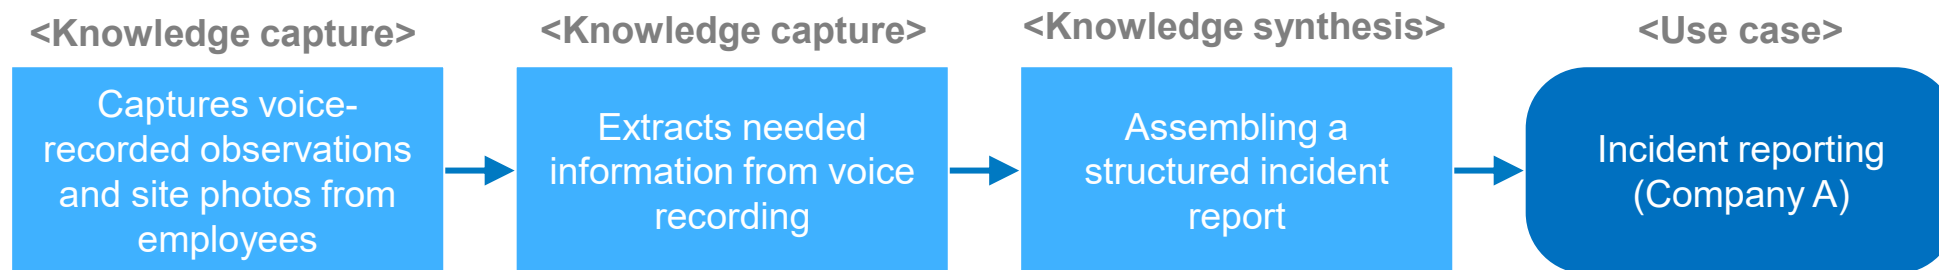

Workflow template

1. Data ingestion
2. Template definition
3. Content assembly
4. Report generation
5. Post-processing & Formatting

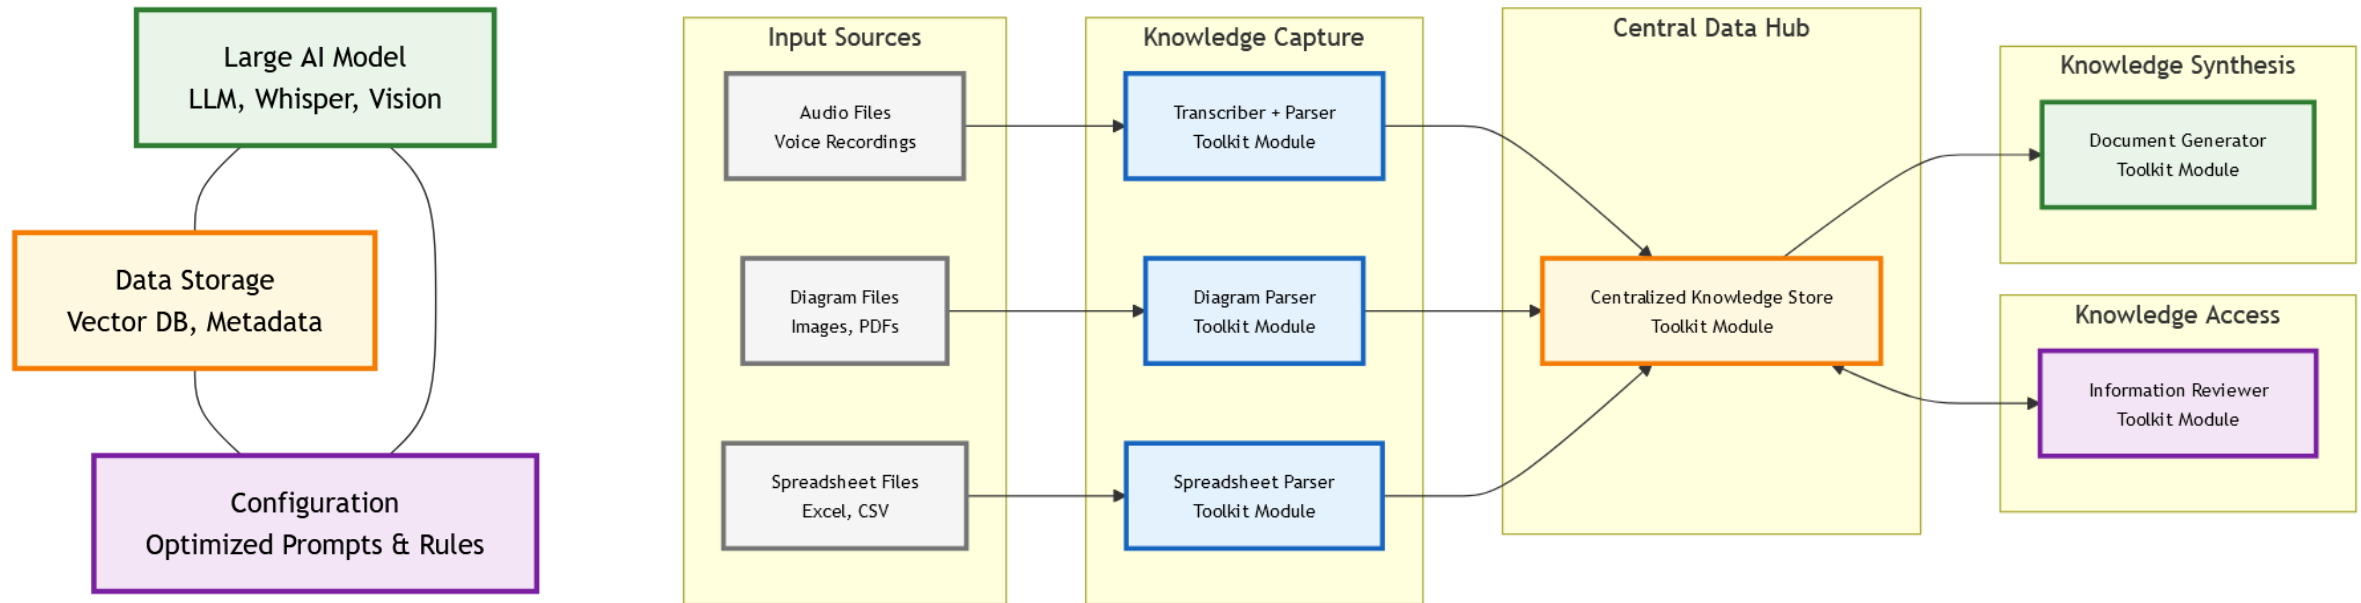

Software components

- Document Loader
- LLM
- Template Manager
- Exporter

# Combining knowledge services for the company-specific use cases

# Asset Packaging in the Toolkit: Modules and Blueprints

## Out-of-Box Modules for Specific Purposes

(Customized and Optimized for Knowledge Management AI Tasks)

– *Technical Layer of the Toolkit*

## Blueprints for the Typical Solutions

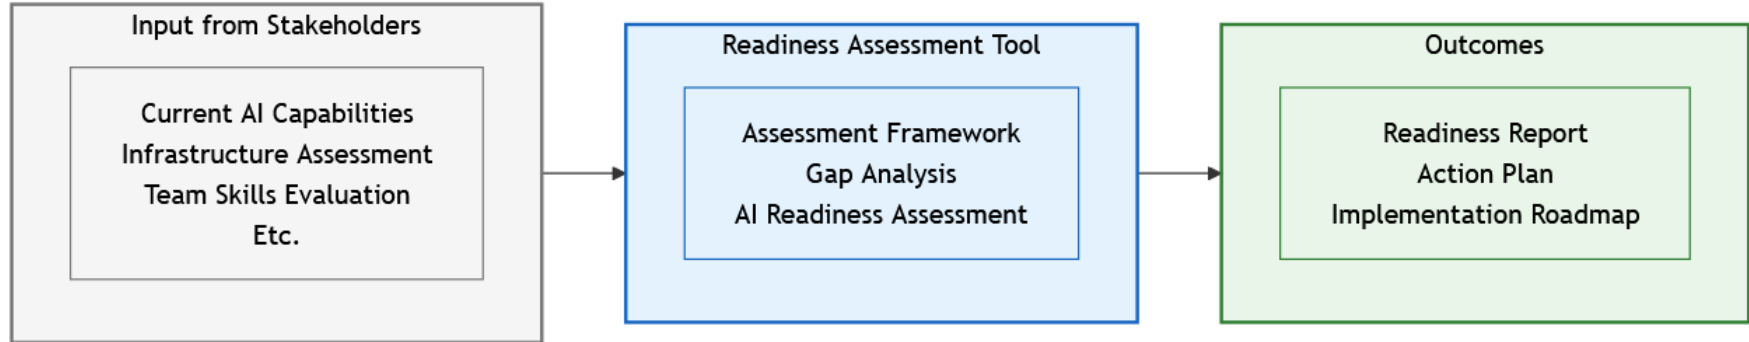

(Knowledge Management Related Applications)

- *Implementation Layer of the Toolkit*

# How you can use the toolkit (examples) - 1/2

**AI Readiness  
Assessment  
+  
Improvements to  
your organization**

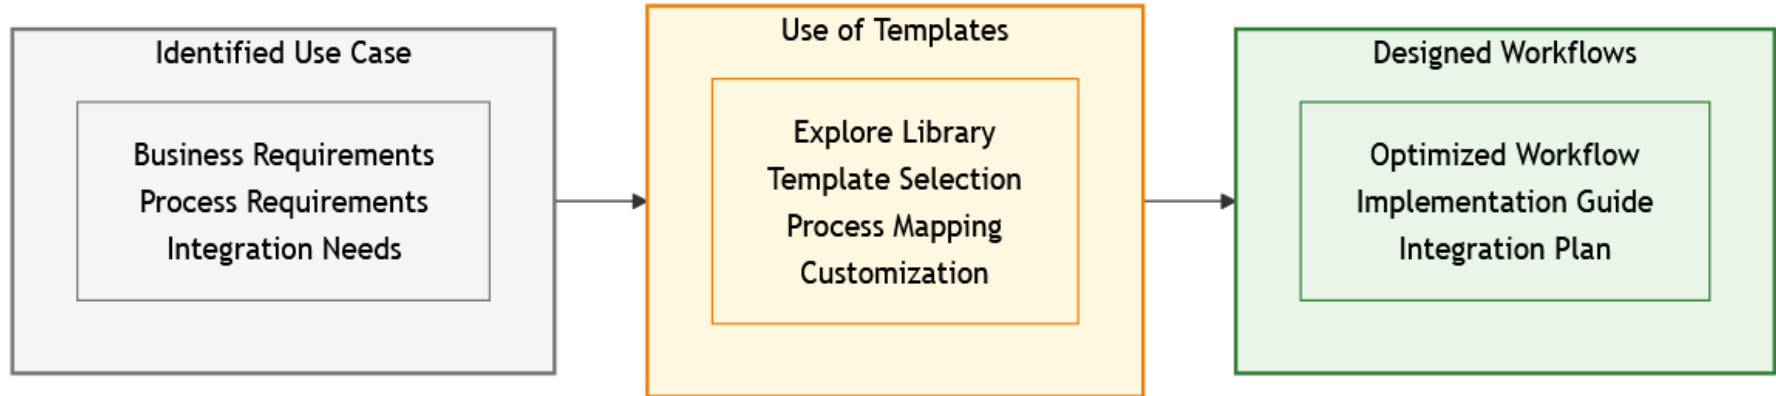

**AI Business Case  
Identification  
+  
Key Information to  
Guide the Process**

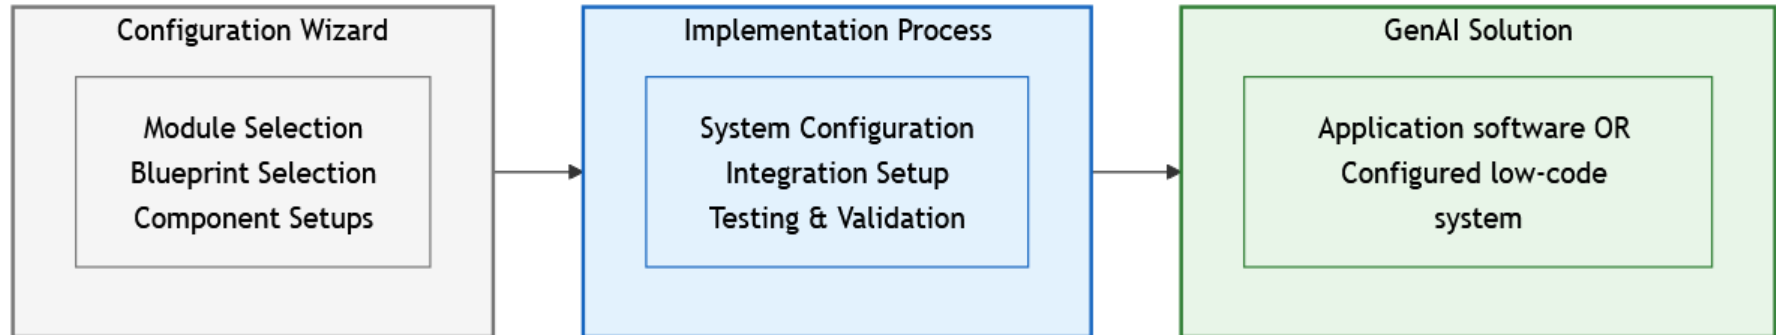

# How you can use the toolkit (examples) - 2/2

**Process/Workflow  
Quick Setup  
+  
Implementation  
Guidance**

**Use of Modules &  
Blueprints  
+  
AI System  
Creation**
